PUBLICLY ACCESSIBLE PROJECTS

NoxKey apps.apple.com/app/noxkey/id6760210699

A native macOS application for secure credential management. Stores secrets in the macOS Keychain and unlocks them with Touch ID; includes an MCP server that lets AI assistants read secrets on demand.

SwiftUI · macOS Keychain · Touch ID · Mac App Store

unticket app.unticket.ai

A web platform for software project management. Connects to GitHub, ingests pull-request activity, and uses a language-model pipeline to generate first-person progress reports for each change.

Next.js · Cloudflare (Workers / D1) · LLM pipeline

Playnist app.playnist.com

A web application for gaming social networking — cataloguing games, publishing journals, following people and boards, and discovering what to play next.

React · Hono · Cloudflare (D1 / R2) · Better-Auth

NoxSpot app.noxspot.dev

An embeddable bug-reporting widget for websites. Captures and annotates screenshots from any page and files them as GitHub issues.

Cloudflare Workers · D1 · R2 · Hono

112Schade app.112schade.nl

A web platform for end-to-end insurance claim management — intake, processing, document handling, and notifications.

Next.js · Cloudflare · FastAPI · Better-Auth

Baseline apps.apple.com/us/app/baseline-stress-reset/id6758278067

A native iOS application for health and stress management. Distributed on the App Store.

SwiftUI · iOS · App Store
